

Micro Channel memory for the PS/2 Models 50, 50Z and 60

- ► Easy Installation
- OS/2, XENIX, UNIX, and DOS compatible
- Extended and
 expanded operation on
 one board
 simultaneously
- Up to 12Mb of extended or expanded memory per board
- Supports LIM EMS 4.0 in hardware for fastest operation
- Faster multi-tasking operation using four separate sets of mapping and DMA registers
- User upgradable
 with standard 256Kb
 and 1Mb SIMMs
- Switchless installation and configuration
- ASIC and surface
 mount technology for
 highest performance
 and reliability
- Optional serial and parallel daughter board for increased functionality

CUMULUS

CuRAM-16 Plus

The CuRAM-16 Plus lets you take full advantage of your IBM Models 50, 50Z, and 60. The CuRAM-16 Plus supports all four memory protocols in hardware for the fastest operation. Extended memory for running OS/2, XENIX, and UNIX; expanded memory (EMS 3.2), the Lotus/Intel/Microsoft standard; EEMS and EMS 4.0 for efficient multi-tasking of Windows 2.03, Excel, and Desqview. The CuRAM-16 Plus is your

complete memory module for the IBM Models 50, 50Z, and 60.

Up to 12Mb of Memory

Save your slots. With the CuRAM-16 Plus, you can have up to 12Mb of memory per board. Using standard SIMMs (Single In-Line Memory Modules), the CuRAM-16 Plus supports up to 2Mb with 256Kb SIMMs, and 12Mb with 1Mb SIMMs.

SPECIFICATIONS

Memory Configurations (maximum)

- ▶ 2Mb with standard 256Kb SIMMs
- ▶ 12Mb with standard 1Mb SIMMs

Memory Speed:

▶ 120 ns

Protocols Supported in Hardware:

- ► Extended
- Expanded (LIM EMS 3.2 and 4.0)
- ► Enhanced Expanded (EEMS)

Software:

- ► Configuration Software
- ► RAM Based Print Spooler
- Extended Memory Emulator—Emulates Extended memory (utilized by DOS Vdisk) using Expanded memory

Optional Module

► Serial and Parallel Port (DOS and OS/2 Compatible)

Power Consumption:

▶ 0.85A Max (+5V)

FEATURES

Expanded or Extended Memory

- ➤ Split into Expanded and Extended memory in 2Mb increments
- ► Change configuration in software

Micro Channel Support

- ▶ Designed especially for the Micro Channel
- ▶ Uses all features of the Micro Channel
- ► Allows maximum performance and functionality for IBM PS/2 Models 50, 507, and 60

Easy Installation

- ► No switches to set
- Automatic recognition of type and amount of memory installed
- Uses an IBM assigned Adapter I.D.
- ► Uses standard SIMMs 256 Kb and 1 Mb for easy user upgrade

Reliability

- ► Surface mount technology
- ► Multilayer Board (per Micro Channel specification)
- ► ASIC (Application Specific Integrated Circuit)
